6. DETOX EFFECT

A small percentage of people may experience a detoxification effect, so we recommend to drink plenty of water before, during, and after a BioCharger NG session, as well as throughout the rest of the day. Taking minerals and electrolytes are not only encouraged, but recommended. Drinking water helps to flush out toxins, unwanted debris, and the "die-off" that can occur. You may experience mild symptoms from flu-like symptoms, headaches, and fatigue. It is the body's way of trying to get rid of toxins!

While ultimately a detox reaction is a sign of **A GOOD THING**, it can still be an unpleasant experience. It is much easier to get through it when you support your body's normal elimination systems. When these organs are working well, and there is sufficient water and nutrient intake, then most detox reactions pass quickly, and sometimes go unnoticed in healthy individuals! This is why it is very important to drink plenty of water, take minerals, and supplements to help support the liver, kidneys, colon, lymph, and other elimination systems. Be sure to do this if you find yourself experiencing a detox reaction and know that we offer high quality supplements to help you do just that.
